

ATAG

SERVING INDUSTRY SINCE 1947

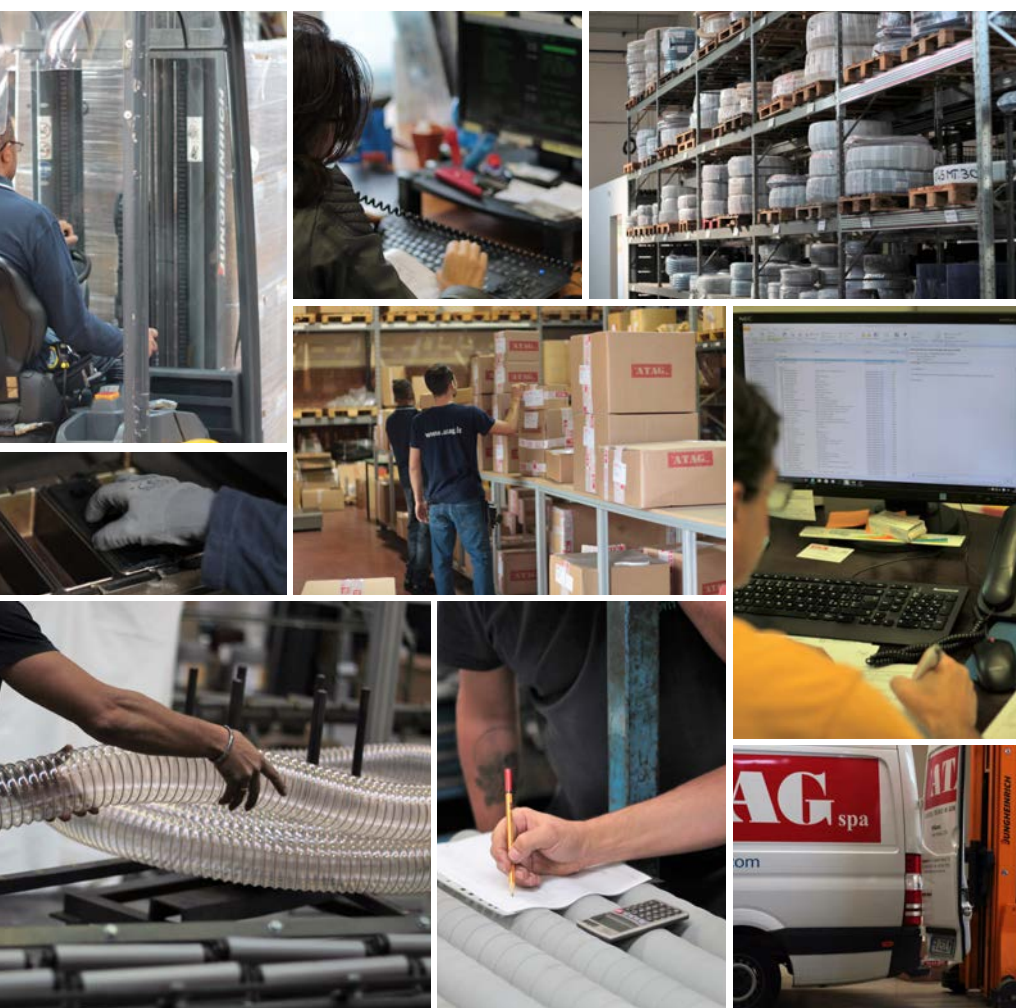

EXPANDED
RUBBER PRODUCTS

WWW.ATAG-EUROPE.COM

PAST, PRESENT, FUTURE

ATAG is serving industry since **1947** and is constantly growing.

The wide range of products, the three domestic locations, the controlled companies, the large warehouses, the extensive sales network, the increasingly stringent internal workings, the website in constant evolution and a service based on the qualified technical expertise offered by our sales department, are the reasons why our customers rely constantly on ATAG.

In recent years we have incorporated complementary companies, using their great competencies to improve our own skills. An efficient export department, our European resellers and long-standing customers, allow us to have a better knowledge of foreign markets and strengthen our presence beyond the Italian borders.

Collaborations and agreements with international prestige partners enable us to offer our country products and solutions that are already appreciated and well established in Europe, and to stimulate our research into improved solutions for the Italian industry.

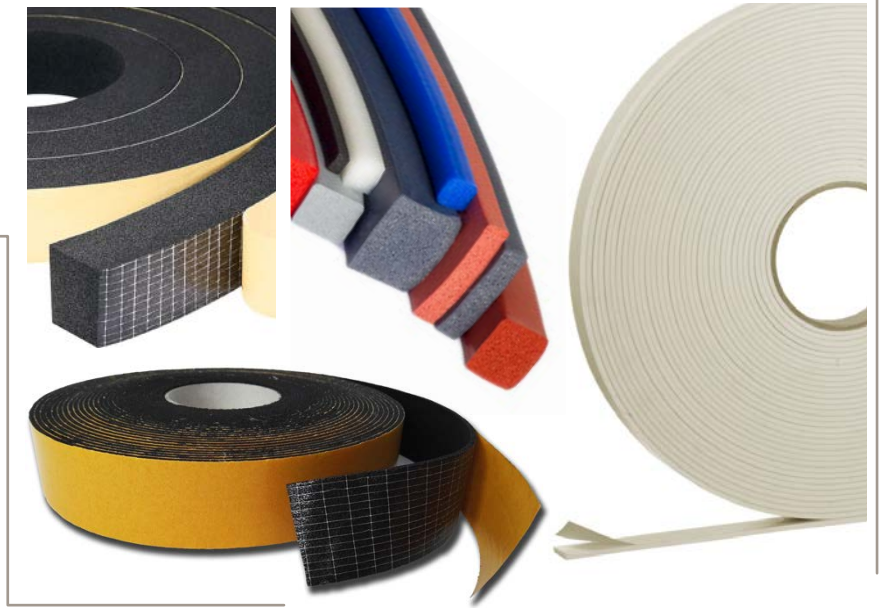

EXPANDED RUBBER PRODUCTS

Expanded rubber profiles square/rectangular section

P4SN.. Normal Sponge Rubber - Bright Grey [not adhes.]
P4SC.. Neoprene Sponge Rubber - Dark Grey [not adhes.]

P4CA.. CR Mousse [adhesive]
P4EPA.. EPDM Mousse [adhesive]

P4SS.. Silicone rubber foam [adhesive and not adhes.]
9AP4SS.. special Silicone rubber foam
(FDA or self-extinguishing quality)

Expanded rubber profiles round section

O4SP.. CR Mousse [not adhesive]

O4SS.. Silicone rubber foam [not adhesive]

9AO4SS.. Special Silicone rubber foam
(FDA or self-extinguishing quality)

100% Expanded PTFE profiles

10PTFENS.. flat Expanded PTFE [adhesive]

10PTFETS.. round Expanded PTFE [not adhesive]

9AL6PTFES.. sheet Expanded PTFE [not adhesive]
(FDA quality)

Rubber mousse sheets Foam Silicone sheets

S3NR.. mousse EPDM sheets [adhesive and not adhes.]

S3CR.. mousse CR sheets [adhesive e not adhes.]

S3SIL.. Foam Silicone sheets [not adhes.]

9AS3SIL.. special Foam Silicone sheets

9CS3SIL.. special Foam Silicone sheets

(Wras or FDA or UL94 or EN45545-n quality)

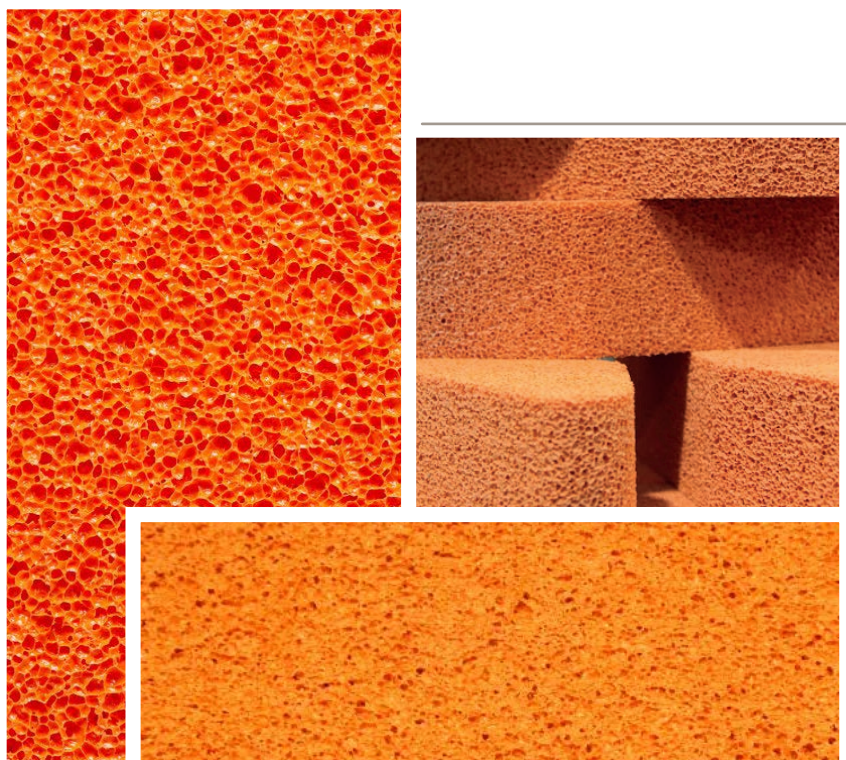

Arancio and Geranio NR sponge rubber

S3ARA.. lastra spugna Arancio [not adhesive]

S3GER.. lastra spugna Geranio [not adhesive]

Open-cell NR (Natural Rubber) foams. Their unique characteristics are softness, lightness, high elasticity, and an almost absent resistance to compression. Very similar to sponges, they have a great liquids absorption capacity. Therefore, ideal for labeling, printing, and painting rolls.

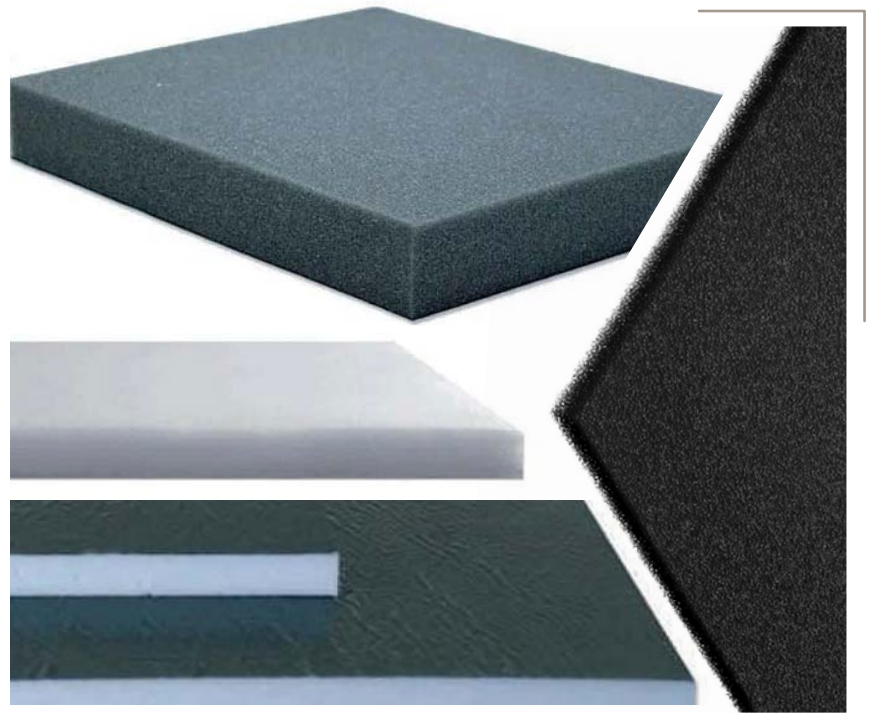

PE, PU, EVA and PVC foams

9A01FIL...

9C01FIL..

Filtering, soundproofing, fillers, sponges, gaskets, mats, panels, rolls.

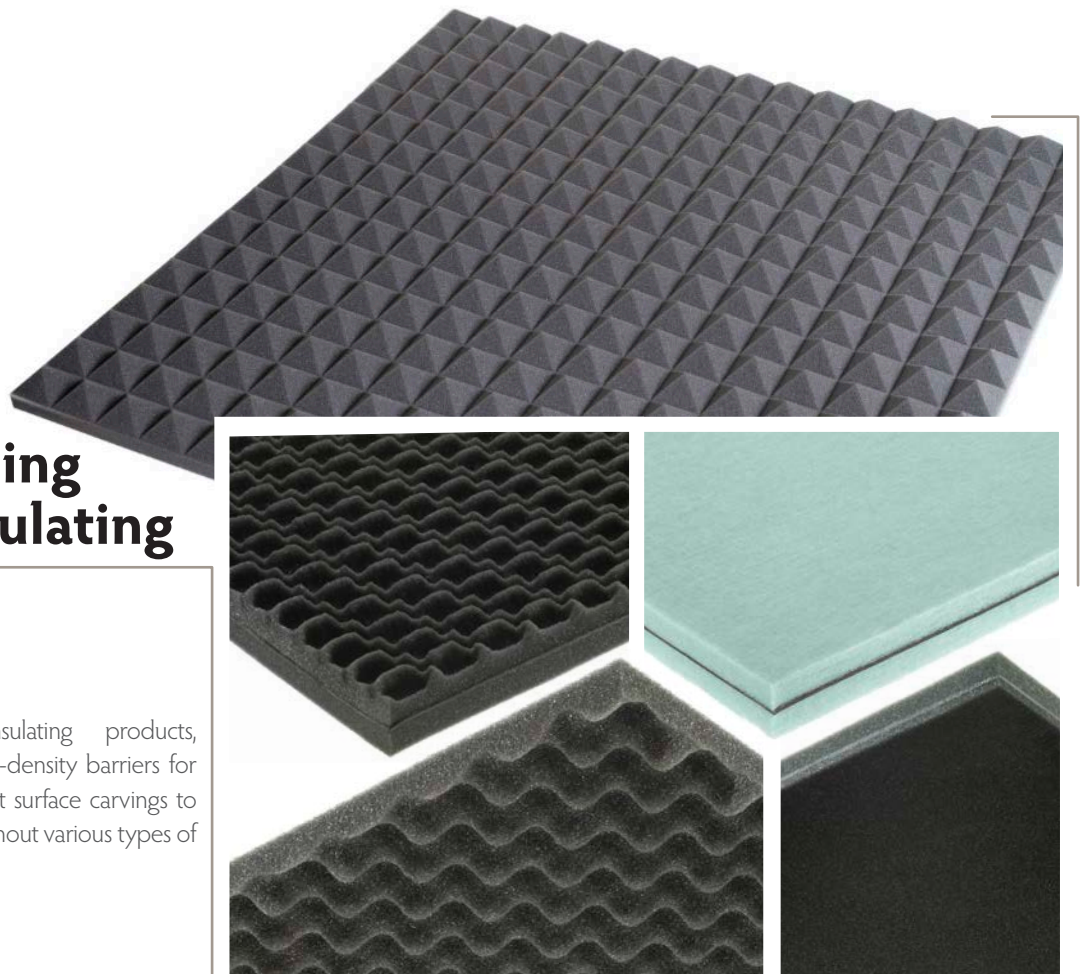

Sound absorbing and sound insulating

L1AF..

9AL1..

Sound-absorbing and sound-insulating products, conglomerates with or without high-density barriers for noise absorption, or with or without surface carvings to dampen sound waves, or with or without various types of protective surface films.

Expanded rubber profiles and coextruded profiles

E4ARC..

9AE4P..

9AE4AR..

9CE4AR..

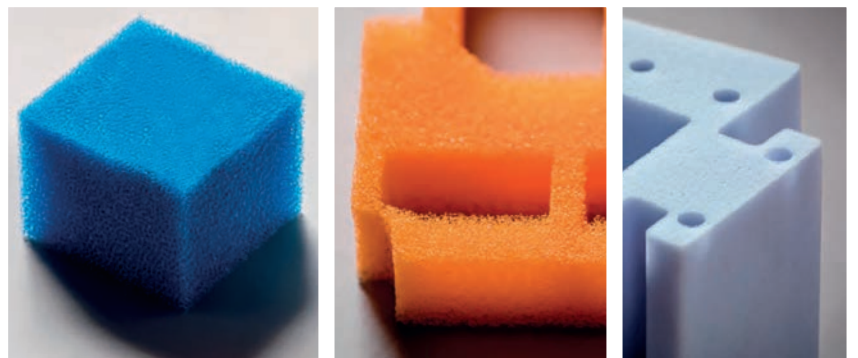

Extruded, co-extruded, or reinforced profiles made in rubber or rubber mousse, Silicone, PVC or other expanded polymers with or without a metal or reinforcing core, for the Automotive, Railway, Naval, Medical, Pharmaceutical, Food and Aerospace industries.

Further transformations on expanded rubber materials

various codes.

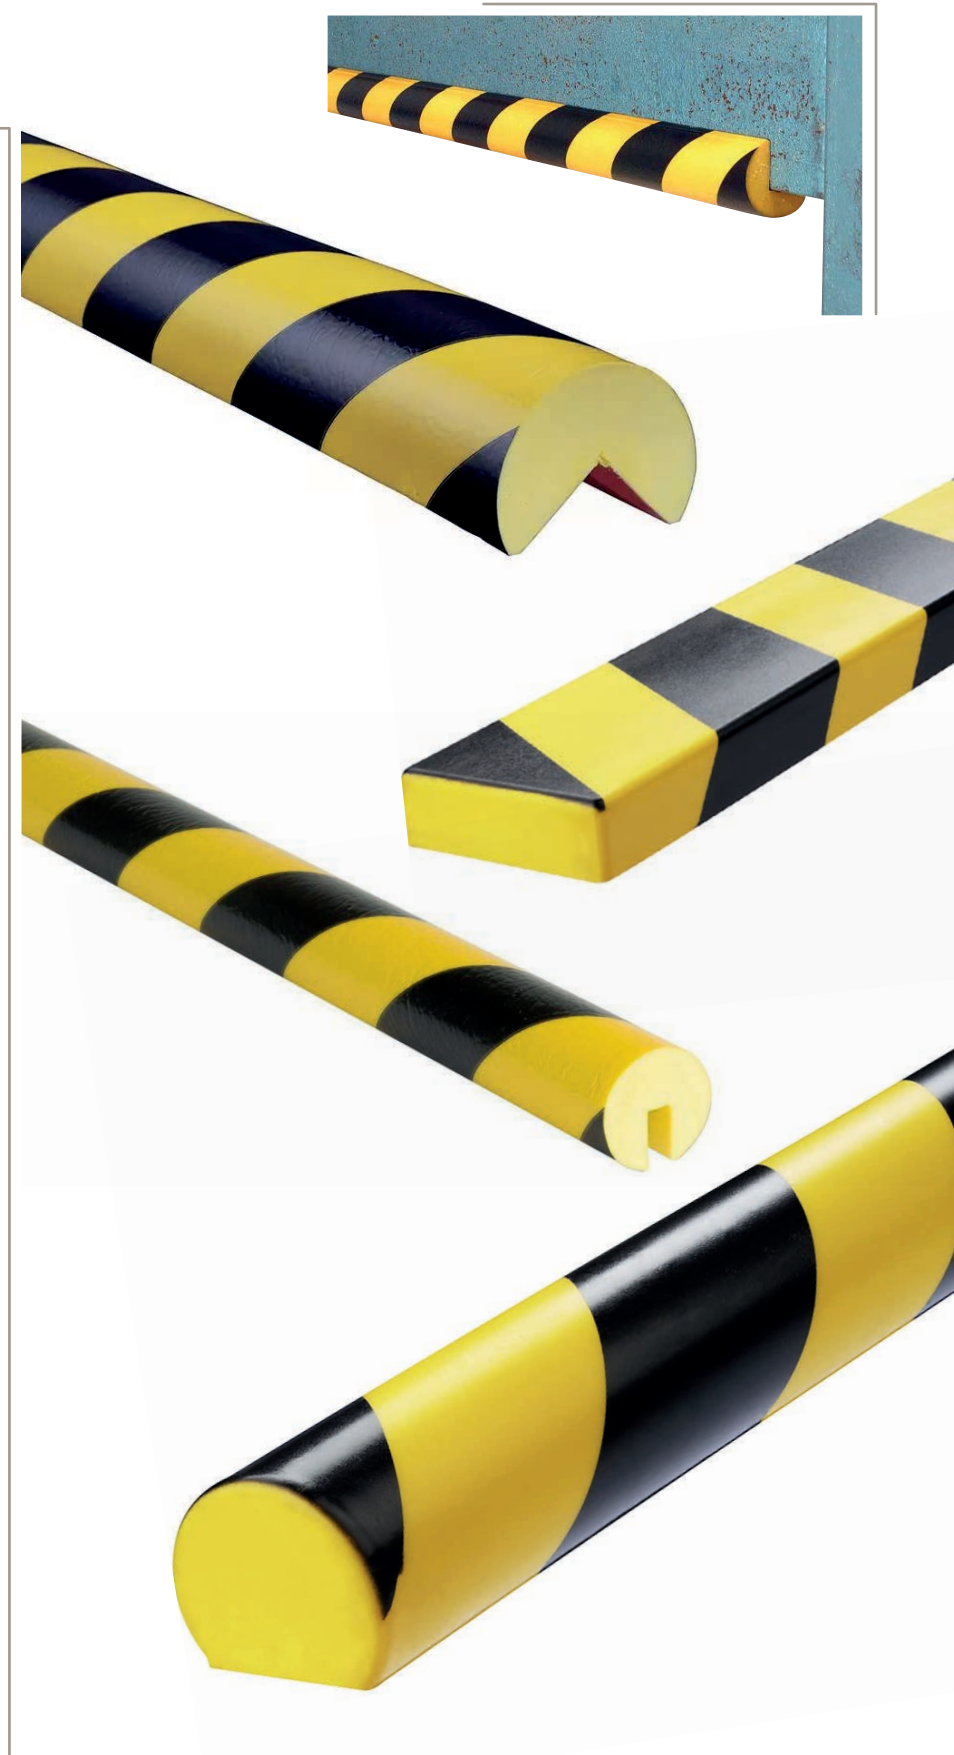

Waterjet cutting, bonding, adhesive applications. We shape your gaskets, filters, panels, washers, fillers, case padding, soundproofing kits, according to your drawings. All processing is carried out in-house to ensure the strictest control over all stages. Our photovoltaic system enhances the efficiency and the cost-effectiveness of the entire process. The environmental sustainability is a priority for ATAG, whose working processes tend to achieve the zero-impact on the ecosystem.

Polyurethane foam Protection Systems

P4SPGN...

Polyurethane (PU) foam protectors equipped with the mandatory yellow/black stripes. They guarantee visibility, comply with safety requirements, and are made of durable, impact-resistant and shock-absorbing materials. Suitable for both indoor and outdoor use. These items absorb shocks and prevent damage by protecting edges. Protective profiles are also available in various sizes for protruding and sharp corners.
